

GroupMe

GroupMe is a chatting platform that helps you connect with your loved ones and friends. It lets you create private chat rooms without limiting the number of people, free of cost. You can also create as many small groups as you like, all for free. Further, you can make your conversations even better by using custom emojis in your chat. With this application, you can organize

game nights, coordinate with your colleagues, and keep in touch with your family members at ease.

Another wonderful thing about this app is that it works on all iOS devices. It also lets you send text messages when your internet network is weak. Sharing photos, videos, and messages become much easier with GroupMe. Additionally, you can use this application to share your location.
