

Overcast

Overcast application is an award-winning iOS platform podcast player. The application boasts a simple-to-understand and immersive UI. Overcast is packed with multiple useful and interesting features. It has smart speed technology that improves the sound quality of the player. It minimizes sound distortion and clears pronunciation, providing a smooth listening experience.

The application lets you download the podcasts so that you can listen to them offline and anytime later. The AI in the application gives you personalised recommendations by keeping a tab on your browsing history. You can search and browse new podcasts whenever you wish to.

Subscribing to a particular podcast or customising your choices is now easier than ever. You can also easily and smartly filter the pods and set the priorities as per your liking. The app is also compatible with Apple Watch, and it supports car play as well. So, get this application now and receive timely updates.
