How to edit text: enter, replace, and delete

You have to be in the insert mode, to insert, replace, or delete text. To switch to insert mode from command mode, press 'i' on your keyboard.

1. Commands to enter text:

- **i:** Enter text before the current cursor position
- **a:** Enter text after the current cursor position
- **r:** Replaces a single character below the cursor's position with the character typed
- **I:** Enter text at the start of the current line
- **A:** Enter text at the end of the current line
- **o:** Creates a new line to enter text, below the cursor's location
- **O:** Creates a new line to enter text, above the cursor's location

2. Commands to replace text:

- **R:** Overwrites many characters. Press the Escape key to stop
- **s:** Replaces a single character below the cursor's position with any number of characters
- **S:** Replaces the entire line
