

4. If you want to mount all the file systems in /fstab, then run the command:

```
sudo mount -a
```

```
File Edit View Search Terminal Help
GNU nano 2.0.9 File: /etc/fstab Modified

# /etc/fstab: static file system information.
#
# Use 'blkid -n value -s UUID' to print the universally unique identifier
# for a device; this may be used with UUID= as a more robust way to name
# devices that works even if disks are added and removed. See fstab(5).
#
# <file system> <mount point> <type> <options> <dump> <pass>
proc /proc proc defaults 0 0
# / was on /dev/sdb1 during installation
UUID=2479675e-2698-48c7-849f-132bb6d8f158 / ext4 errors=remount-ro 0 1
# swap was on /dev/sdb2 during installation
UUID=05bbf600-07fa-4473-9774-cf4b2602d0d6 none swap sw 0 0

# tbstorage network mount
UUID=66E53AEC544550B2 /mnt/tbstorage/ ntfs-3g auto,user,rw 0 0
# tbstorage2 network mount
UUID=0F0FFA6L3A00390C /mnt/tbstorage2/ ntfs-3g auto,user,rw 0 0

Important commands

Conclusion

Fstab is a configuration file that helps in automating the process of mounting partitions. It is used for storage devices such as floppies and CDs. Understanding the concept of fstab can be difficult at first. However, once you understand its file system and different partitions, fstab becomes easy to handle. Fstab controls the interpretation of all the filesystems that are introduced in the system. Different commands and codes are listed under the fstab file table to make the naming and forming of filesystems easy. In the fstab filesystem, there is an option to check the utility of backup. Most of the file system works on binary numbers.

For a new user, decoding this filesystem is tricky. You will have to put in the effort to learn this filesystem. In this article, we have learned about fstab, its structure, and the 6-column format of fstab. We have also gone through the details of the types of file systems. This article will not make you an expert in fstab, but will surely make this topic easy for you. The steps mentioned here will make executing this procedure easy for you. **d**
