

Turn your special moments into an exciting movie.

Unique features:

- Trim clips with your fingers, add titles and subtitles.
- Add soundtracks and extra special effects to make it attractive.
- Add seamless transitions, fade audio like a pro, and your stunning cinema-quality film is ready without any hassle.

Whether you're working on a silent film, creating a full-fledged video, or have something to say, iMovie can be a real treat.

LumaFusion

You can recapture the magic of storytelling with LumaFusion. LumaFusion is a video editing app specially designed for iPad and iPhone with an intuitive, easy-to-understand UI/UX. It's hands-down one of the most advanced video editing apps on iOS. So, whether you're a beginner or more experienced with video editing, LumaFusion can be a good option.

If you're into video editing, start your journey with LumaFusion
