

When it comes to editing, ActionDirector is one of the more preferred apps, as it offers plenty of features suitable for beginners and pro editors.

Unique features:

- Record and edit on the same platform.
- Effects for videos can make any project come to life.
- Adjust the background colour, saturation, and contrast.
- Record a video with music from your library.
- Trim and cut for more precise delivery.
- Over a dozen transitions to add to your videos.
- Add text, titles, and animated stickers to your videos.

An app for easy and on-the-go video editing

PowerDirector

Whether you've created a full-fledged promotional movie, or you're editing videos of your latest adventure, PowerDirector will amaze you. PowerDirector allows you to unleash your creativity and explore your imagination by creating visually appealing videos.

Unique features:

- Produce high quality videos on mobile phones.
- Features speed adjustments that produce flash forward and slow-motion videos.
- Fix shaky or blurry clips with a video stabiliser.
- Features quirky audio effects.
- Interactive and eye-catching intros with animated titles.
- Features overlay and blending modes.
- Easy trim and rotate with a single tab.
- Control brightness, colour, and saturation with precision.
- Apply interesting effects with drag and drop.

Translate your imagination into videos through PowerDirector
