

Quik

Quik is a free video editor that handles 4K video and can add up to 75 photos and video clips from your gallery to produce a single video. Though it does most of the editing on its own, Quik lets you customise a few details as per your choice.

Unique features:

- Works efficiently with motion photos.
- GPS stickers to show how fast you were moving.
- Features over 20 themes for occasions like New Year, Christmas, and so on.
- Options to record, trim and rotate videos are a highlight.
