

or adjust the canvas to eliminate these unwanted bars. So, let's get started!

- Click on the canvas icon, which is right on the bottom left-hand side corner.
- Once you tap on the canvas icon, there are a bunch of different aspect ratios such as Instagram icon 4:5, youtube icon 16:9, musically icon 9:16, and so on.
- 4:5 is the aspect ratio this video was filmed in, so there are no bars around it.
- You can choose to pinch and edit the video itself in the aspect ratio or make it perfectly line up to eliminate the bars.
- The no frame option makes the InShot timeline ratio the same aspect ratio as the video was filmed in.
- Once you tap the tick option, the blurred bars will automatically go.
- You can crop the image or video before you start editing it, or pinch and zoom as per your requirements, and crop or resize it for the final product.
- Press the tick button to save the changes.

Now, when you have a clear idea of how to adjust the canvas to set an aspect ratio, you can make the required changes in your videos and images without any compromises.

In order to adjust the canvas to set an aspect ratio of all the selected images and videos, click on the “Apply to all clips” option by tapping on the double tick mark in the left-hand corner, and the selected aspect ratio will be applied to every file you choose.

The blurry frame around the canvas

## Final thoughts

InShot is a feature-rich video editing app that lets you explore the different aspects of editing and enhancement options. It isn't like any other editing app, and its features allow users to up their social media game, especially on Facebook, YouTube, and Instagram.
