In this chapter, we will talk about InShot filters, what they do, and what their various types are. So, without any further ado, let's get started!

If you want to unleash your creative side or want to deliver engaging content for your business, start your video editing journey with InShot.

What are filters?

In simple words, “filters are the special effects that visually improve a particular shot or a video”. When developing a video editing app, tons of factors are taken into account. Filters are one of the most preferred factors that are taken into consideration to make the app more appealing to a wider audience. The world of Instagram and Facebook is highly influenced by these filters that specially target the new generation who likes to click, edit, and post!
