

the styles manually yourself. Change the contrast by moving the slider up or down, increase or decrease the warmth, add a tint, colors, and much more.

Stick to what looks visually appealing to you and save the changes by clicking on the tick mark option. To apply changes to all, tap the double tick option on the left-hand corner, adding effects to all the selected videos.

Let's understand the most popular InShot filters in detail

• Glitch

The glitch effect has a deep-rooted meaning that signifies the presence of flaws in the original image or video. The glitch effect leaves a rugged or flashy effect when you apply it. Nowadays, the glitch is widely used by editors and filmmakers as it adds impact to the simplest videos.

• Beats

To make the video look aesthetically appealing, beats are the most preferred filter that is widely applied by youngsters in their videos and images.

• Retro

The retro filter adds a black and white touch while imitating the retro style. It gives your videos a vintage look and premium feel.

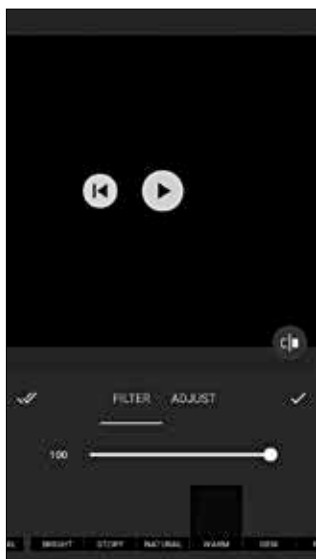

• Celebrate

The celebrate filter adds a sparkly and flashy touch to your videos that leaves everyone grooving. The most popular choices in the celebrate category are neon, snow, stars, ribbons, and bubbles.

• Style

Another powerful filter that showcases your creative side is the style filter. This category includes the most popular InShot filters such as mosaic, motion, blur, depth, print, and comic.

Apart from adding filters, one can easily adjust these changes according to their preference by clicking on the adjust option.
