

Let us see how we can install the KineMaster app and edit videos using its several editing features.

## How to set up an account in KineMaster?

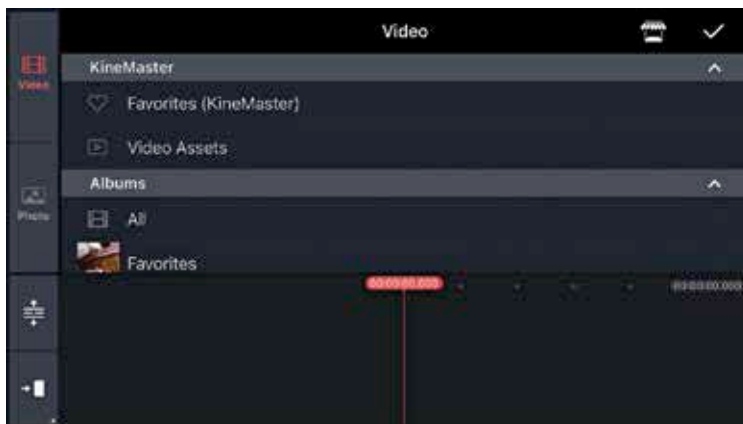

To use the KineMaster app you can download the app on your device and then install it. Android, iOS, and Windows users can download the app from Google PlayStore, App Store, or the KineMaster website directly. The downloaded apk file can be used to install the app on the system. The following configuration is recommended for use on a PC.

- A Quad-Core or Dual-Core CPU
  - RAM between 2 and 4 GB
  - Free disk space of 1.5 – 2 GB
  - GPU with OpenGL 2.1 – 4 support
- You can use the app directly to sign in.

## Video editing in Kinemaster

### Step 1: Shoot your video

For any video or content editing, you should first shoot the video. If you have to use it for professional purposes, opt for a professional camera. However, to make personal videos you can use the camera on your smartphone.
