

Step 7: Video export from KineMaster

When you finish editing the video and are satisfied with it, you can export the video. For this, simply tap the “export” symbol on the top-right corner. While exporting the video KineMaster users can also select the video quality like frame rate, video resolution, and bitrate.

The video that you want to export can also be uploaded directly to YouTube or any other social media platform. This will appear on your Android phone as well.

Upgrade to KineMaster Pro version

All the edited videos of KineMaster are watermarked. If you don’t want the KineMaster logo on your videos you can upgrade your account to “KineMaster Premium”. You can find offers for subscription, but the basic rate is around \$39.99 per year. There are many more benefits of opting for the KineMaster Pro version.

Benefits of KineMaster Pro:

- More text fonts
- Watermark free videos
- More Effects
- Multitrack editing
- Precision Control

KineMaster pro is a more affordable app than other video editing apps. Premium users of the app can also get customer support to resolve problems. Professional video editors prefer the premium version.

Conclusion

You can download KineMaster and install the application on your laptop or phone. When you download the software you can use its features to edit your videos and give them a personal touch. This can be done at no cost, however, the paid version of the app has more features.

KineMaster is popular as a free video editing app and there are many things you can do with your video. Like discussed earlier, you can use the free version of KineMaster to edit your videos but the final video will have the KineMaster watermark. Follow this step-by-step tutorial to set up KineMaster and if you wish, upgrade to the paid version for more benefits.
