

Multiple video tracks in the timeline

the red circle below the media icon to record videos directly from the app.

- Further, there is an icon for the KineMaster marketplace or Asset store from where you can purchase transitions, music, effects, overlays, fonts, etc.

Pinch tracks for precise editing and swapping the clips.

You can tap on the video you have selected and swipe left and right to move around the clip easily.

If you want to precisely edit a clip, put some effects in it, or simply just trim it out, you can pinch on the clip you want to zoom in and out.

And if you have got multiple clips in your timeline, you can just tap and hold them to change their order or just change their positioning according to the number of clips you have put in your timeline.
