

Swiping down allows you to apply effects such as a shadow, outline, glow, colour, full-width backdrop, and more. To change the text colour, select the white-coloured circle outline next to the right of the scissor icon.

How to add music to your project

Whenever we add music to a video, it instantly makes it better. Let's say you want to add some music from your phone or tablet to your playlist. Draw a red line at the bottom of the page to indicate where the music should begin. You can choose a song by tapping the music icon.

When you choose your music, a red plus sign will appear. The music will begin to play, allowing you to double-check that this is the song you want to add. If you're sure it's the appropriate music, tap the red plus sign, and the title will appear at the bottom of the screen.

Conclusion

KineMaster is the finest mobile video editor for 2021 since it is the preferred choice of all digital marketers and editors. Here are some compelling reasons to choose this app over other comparable apps.
