

such as Facebook, Instagram, and Youtube. This feature helps editors to publish their videos instantly and reach their target audiences.

KineMaster has different tools, and one of the most crucial tools is the trimming tool. The app allows trimming of the video frame by frame. It also helps in setting up the video in sequence. You can use this app for free, but there are two different premium options available.

Now, you may ask why you have to buy the premium version of KineMaster if you can use it for free? The reason is that you will not be able to enjoy all the advanced filters and tools that are on the premium version. Hence, if you wish to use the advanced features, you will have to pay \$4.99 (approximately ₹370) monthly or opt for a \$39.99 (approximately ₹2968) yearly version.

Filters on KineMaster

The KineMaster app has a whopping 90 filters for its users to choose from. These 90 filters are only available to premium-paying customers. But those using it for free, have a choice of about 38 basic filter options. Some of these filters are:

1. Colour filters
2. Blur filters
3. Audio effects
4. Brightness effects

Colour filters

One of the key features when editing any video is colour correction. Colour correcting or using colour filters helps in adding a nice touch to the selected media. In the world of editing, adjusting the colour is considered the first step of editing. There are nine different types of colour filters available on the KineMaster app.
