

the intensity of the filter which is then reflected in their clip. It means they can choose whether they want to completely tint it or slightly skew the video towards the selected colour.

Effects in KineMaster

Effects in the KineMaster app are used to add an edge to a video or media. Effects such as filters are invaluable as they help in enhancing the look of the media. In the unpaid version of KineMaster, you can only use two effects - the Gaussian Blur and mosaic effect. In the paid version however, you have access to numerous effects. The app keeps on updating new effects for paid users. The effects currently available on the KineMaster app are:

- Square Halftone
- Rolling Ball
- Auto HDR
- Interference
- Poster Perfect
- Radial Blur
- Prismatic
- Split Spectrum
- Pinch / Bulge
- Anaglyph Slide
- Digital Crash
- Neon Outline
- Ripple
- Kaleidoscope
- Sketch 2.0
