

Most popular video editing apps available on iOS

Splice

Simple yet powerful, Splice is a popular video editing app that can easily create fully customised and professional-looking videos on your iPhone or iPad. This powerful editing tool has made it simple to trim, cut, and crop your photos and video clips in just one go. It's never been this easy to edit like a pro on the go!

A great video editing option for iOS users

Unique features:

- Adjust exposure, saturation, and contrast.
- Adjust playback speed and add slow-motion effects.
- Overlay pictures and multiple clips to create mesmerising videos.
- Remove and replace the background with a chroma key.
- Refine your backgrounds by adding filters, colours, and orientation.
- Animate your videos with amazing effects like vintage, chroma, and more.
- Add titles, subtitles, text, and custom outro.
- Bring your photos to life by creating a series with pan and zoom effects.
