

balance, brightness or contrast of a large number of images. More photo management oriented rather than detail oriented), Adobe Prelude (used for rough cutting a large number of videos), Adobe Audition (to add some music functionality – recording, editing and mixing audio), Dimension (this is used for adding 3D objects in a 2D background, pretty useful in places like advertisements and branding), Adobe Fuse (used to create detailed 3D humans and maybe even hybrids and androids), Adobe Fonts (making things intriguing with a range of fonts fresh and stale, previously called Adobe Typekit), Adobe Spark (which is again a design app like Illustrator but it's online and it's free). All these along with some dumbed down versions (the Elements series) and mobile versions of some of the most popular offerings like Photoshop, Premiere Pro and Illustrator. It's a very neat and tied in ecosystem which is an all round comprehensive offering on its own

HEAD IN THE CLOUD

As explained in the previous section, all of these applications are offered on the Adobe Website at various price ranges. We'll be using the free 7 day trial version on this endeavour, the best part of which is that it's a fully weaponised trial. Every single application on show from Adobe with it's absolute potential unleashed for one whole week. Enough time to get acquainted with this bad boy (or girl, whichever you prefer) but also not enough to get close to it's core which leaves you wanting more.

The Adobe Creative Cloud subscription offers the following applications for desktop and mobile for designing images, layouts, graphics, video and audio for print, user experiences, the web and mobile devices:

- Photoshop
- Illustrator
- InDesign
- Adobe XD
- Lightroom
- Acrobat Pro
- Animate
- Dreamweaver
- Premiere Pro
- Premiere Rush
- After Effects
- Dimension
- Audition
