

better. After the initial month, you can decide how to proceed, if you wish to proceed.

2) Annual plan, prepaid – ₹47,889.12/ year

If you've got the cash and you're committed, this is the way to go. One time payment and it's all yours.

3) Annual plan, paid monthly – ₹4230.30/ month

When you have the commitment but your cash flow's a little slow, this is a good catch. You'll end up paying slightly more than the prepaid plan though.

All the applications mentioned in the previous section are available individually along with some apps that are bundled together and sold as packages like the Photography bundle (Lightroom and Photoshop) which actually works out to be cheaper than the individual applications themselves (a pricing strategy that gets you hooked into more of their offerings), along with the Substance 3D Collection and Substance 3D Texturing Bundles.

Businesses have a different model with prices charged per license.

- 1) All Apps are priced at ₹5412/ month
- 2) Single apps are priced at a standard ₹2300/month.

The Education plans are the most affordable of all and provide bang for buck (a penny in this case):

- 1) Schools and Universities need only pay ₹2367/ month for all apps and ₹1014/ month for single apps
- 2) Students and teachers save over 60 per cent and only have to pay ₹1596.54/ month

These are the prices for the first year, a great deal for the onboarding process, on the second year though, there's a small price hike of about ₹800/ month but that's still more cost effective than all the other options. And because both of these are already such heavily discounted plans, it's the same if you pre-pay or pay monthly.

The membership begins as soon as the Adobe store fulfils the order. The applications are stored locally on your computer once installed and the Creative Cloud desktop app is then used to download, update and access all individual apps. Adobe also has a ton of neat tutorials and worksheets on their website to learn from the basics.

Make a wise choice, you must.
