

The Adobe After Effects start screen first open with a set of tips that are personalised based on the user's preferences which is obtained from the 3 step questionnaire filled in during the installation procedure.

tips (image below) and these seem to be based on your preferences in the aforementioned questionnaire. And then it's straight down to business!

As a beginner (which Adobe recognised), the app straight away shows a tutorial which is pretty convenient to get started and makes the introduction a tad less intimidating. On the left, you can choose 'Home' to come back to this tutorial but there are also other options like 'Learn' with more resources. 'New Project', 'Open Project' and a couple of other options which we do not require yet.

For now, let's click on the 'Start Free tutorial' to get Get Started with the basics.

Marked with the red arrow, this is the first step in our learning journey; a basic tutorial.
