

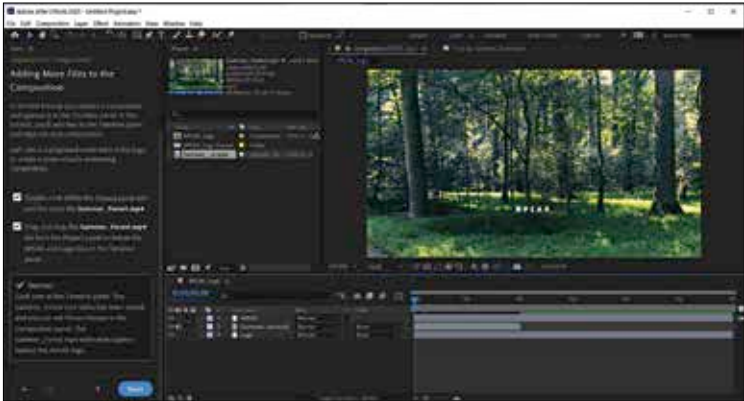

Figure 2: In this version, the APEAK logo text is the topmost layer, followed by the video and then the actual logo itself, which is why the logo is eclipsed by the video

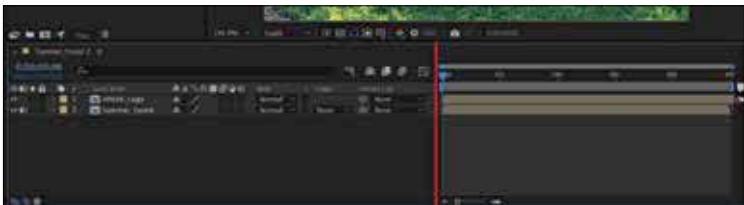

seems to be the top most layer and the last seems to be the bottom most layer. This is noticeable in the images below.

Since the layers are stacked one on top of the other, you can play around with it to see what different arrangements do. Since the logo vectors don't have a background, the video will always be visible in the background as it is not eclipsed by the logo elements. The appearance of your composition is determined by how you stack and position layers.

The layers can be dragged in the Timeline panel by clicking the elements on the left side.

On the right side is the timestamp which determines at which point of time, each element comes into play.

Each element has a different colour in the time block and the duration and timing of each layer can be smoothly rearranged by dragging it with the positioning bars on either side of the time bar – the starting time on the

On the left side of the line is where you can reposition the elements in the timeline panel, on the right side is where you can change the timing of each element.
