

Creating a New Composition

From scratch

Compositions in analogical terms are like the building blocks of an After Effects Project. There are several ways to create a new composition:

- When starting a new project, click on the New Composition in the center of the composition panel.
- Opening a new Composition from the toolbar, click Composition → New Composition.
- While trying the above method, you will also notice that there's a shortcut mentioned next to New Composition → Ctrl + N
- The final method is clicking on the New Composition symbol in the Project panel.
