

picture studios alike. In this FastTrack, we'll take you through the entirety of learning how to use After Effects. Along the way, you'll learn about the perks of being within the Adobe Ecosystem which consists of numerous other content creation applications, you'll learn about the UI and how you can go about getting started with a simple project. Later on, you'll get an idea about the video editing aspects, how you can utilise paths and also get a grasp on blending and masking, some of the most commonly used aspects in After Effects.

We hope that this FastTrack will not only help you get started with After Effects but also improve your content creation pipeline at the end of the day. As always, we're open to your feedback. You can reach out to us on editor@digit.in and let us know how we can improve the FastTrack and if you have any suggestions for future FastTracks, then we're all ears.
