

Opacity of the shape. There's a checkbox that you can select if you want a preview.

Clicking on the colour next to the Fill option will open the Shape Fill Colour dialog box. Here you can either choose a colour and intensity from a palette or if you have a specific colour and know its colour hex code, you can type in the 6 digit code. This box to has a Preview toggle which is pretty neat.

Finally, the Stroke option also has a dialog box to choose the Stroke type. If you don't want a stroke outline, then just change the value to 0 and if you would like to have a border, then you can define it in terms of pixels by changing the value on the right.

The Fill Options dialog box for shapes

The Shape Fill colour dialog box with multiple options for conveniently choosing a colour.
