

Apart from Bitcoin, there are several other cryptocurrencies. They are:

- Ethereum
- Tether
- Polkadot
- Binance coin
- Ripple
- Litecoin
- Chainlink
- Dogecoin
- Stellar
- Uniswap
- Elrond
- TRON

If you're interested in learning about these cryptocurrencies in detail, keep on reading as we've discussed these currencies in detail in the coming chapters.

Advantages and disadvantages of cryptocurrency

1. Lower transaction fees and elimination of banking charges

In traditional business dealings, middlemen like banks or bank agents typically charge a heavy sum as fees when buying or selling things online. These
