

- **Identity security**

Civic is an organisation that allows individuals to have a closer look at who has their information. The company uses the blockchain-based ecosystem where the users have the power to decide who can enter into their personal details and how much.

- **IT**

Evernym's Sovrin is another organisation based upon the blockchain ecosystem that lets individuals decide who can enter their information.

Conclusion

Decades ago, when the internet was first introduced, it brought an unsaid revolution in the entire world, and blockchain is on the path of bringing something big that no one ever imagined. Over the years, blockchain has gained immense popularity due to its remarkable features and benefits. Now there's no way of going back!

In the next chapter, you will read about the concept of DeFi. Stay tuned!
