

successfully installed the driver using only one GPU.

- When you switch the computer back on, it should immediately recognise each of them and install the necessary drivers. Just keep in mind that it will take some time (about 5-10 minutes) for all of the GPUs to be correctly recognised.
- You can check to see whether all of the GPUs are shown in Device Manager.

- Now, all you have to do is simply power on the computer and wait 5-10 minutes for Windows to complete its tasks. And, that's about it for this process.
