

• **Ways to buy cryptocurrency**

- **Through Financial Apps**– Financial apps are the easiest ways to buy cryptocurrency. Here are some of the many apps available to purchase cryptocurrencies. The main aim of using financial apps is to gain profits in dollars.
 - **Cash App**– Every year Cash App securely transfers millions of funds from one mobile device to another mobile device. Square built this mobile-centric app. Users can also add an optional debit card and also transfer money via an ATM.
 - **PayPal**– Users can buy four different types of cryptocurrencies: Bitcoin, Bitcoin Cash, Ethereum and Litecoin via PayPal.
 - **Robinhood**– Robinhood offers a wide variety of cryptocurrencies like Bitcoin, Bitcoin Cash, Ethereum and Dogecoin. Robinhood is a beginner-friendly US-based app. Though investors can purchase, sell and hold cryptocurrencies, this stock trading app is unable to transfer cryptocurrencies to another wallet.
 - **SoFi**– SoFi includes 21 different types of cryptocurrency transfers. SoFi allows passive income by putting coins in collateral known as staking.
- **Through Centralised Exchanges**– Transferring cryptocurrency through centralised exchange refers to transferring cryptocurrency via a third party. Centralised cryptocurrencies like Coinbase, GDAX, Gemini and Kraken are reliable and user-friendly. However, the chances of getting hacked are high, and in some cases, they charge a transaction fee. For Example, Bitcoin charges 0.012% to 0.1% in transaction fees.
- **Through Decentralised Exchanges**– Decentralised exchanges can transfer cryptocurrencies independently, i.e. without involving any third party. Trenton and Venlon are some decentralised cryptocurrencies that offer high security and low hacking risks. It also protects data from market manipulation. But there exist some disadvantages as well. It is unable to execute fiat payments. Sometimes, password recovery can be difficult if users forget it.
- **Through NFTs**– NFTs help to bid cryptocurrencies for digital wallets. To buy a digital cryptocurrency, a wallet must be funded. OpenSea is the second most popular platform for NFTs. It helps Ethereum wallets like MetaMask to purchase cryptocurrency through NFT. Gemini includes some traditional payment options like credit cards through NFT. Investors can buy, sell and create NFTs. Digital assets, like NFTs, really can be beneficial for investors.
