

50. Yearn.finance

An integral part of the DeFi ecosystem is specifically designed to give rise to yield on smart contract platforms such as Ethereum. Yearn.finance is either maintained by a group of independent developers or the YFI holders.

Since human existence on the planet, currencies have played a significant role in everyone's lives. A few years back, cryptocurrency was introduced as a form of decentralised digital money. It is based on blockchain technology, which is a powerful medium of exchange secured by cryptography (a unique technology that prevents counterfeit or double-spend). It is believed there are more than 5,000 cryptocurrencies revolving in the market, which is insane. With this, we come to an end to our discussion of cryptocurrency!
