

Parliament, which would aim to, “provide for protection of the privacy of individuals relating to their personal data, specify the flow and usage of personal data, create a relationship of trust between persons and entities processing the personal data, protect the rights of individuals whose personal data are processed, to create a framework for organisational and technical measures in processing of data, laying down norms for social media intermediary, cross-border transfer, accountability of entities processing personal data, remedies for unauthorised and harmful processing, and to establish a Data Protection Authority of India for the said purposes and for matters connected therewith or incidental thereto”, is still under review by a committee.

So, the wait continues for the Indian citizens. But there are some laws which are in place that will help you get things sorted out the legal way, if they go sideways.

Still under review in India

The Information Technology Act, 2000

Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011

These rules, as stated in the name itself, were released in 2011, and lay down a lot of important definitions and guidelines which help the
