

government agencies to define and investigate matters related to online information and its eventual use and theft.

Under this, a password is defined as, “... a secret word or phrase or code or passphrase or secret key, or encryption or decryption keys that one uses to gain admittance or access to information”.

On the other hand, personal information has been defined as, “... any information that relates to a natural person, which, either directly or indirectly, in combination with other information available or likely to be available with a body corporate, is capable of identifying such person. “

These rules also provide guidelines for acting upon and dealing with subjects like, “Sensitive personal data or information”, “Collection of information”, “Disclosure of information”, etc. Under the rules, sensitive information of an individual is defined to be composed of the following:

- (i) password;
- (ii) financial information such as Bank account or credit card or debit card or other payment instrument details ;
- (iii) physical, physiological and mental health condition;
- (iv) sexual orientation;
- (v) medical records and history;
- (vi) Biometric information;
- (vii) any detail relating to the above clauses as provided to body corporate for providing service; and
- (viii) any of the information received under above clauses by body cor-
