

the receiving end of things. But we are aware that what effect it does have on the minds of people in many cases, and how serious it can be.

3. Stay positive and never troll

Trolling and negativity have become a widespread phenomenon on the internet, where children can themselves fall prey to it and go into a state of mental ill-health in some severe cases. So, it is important to make sure that children, when speaking to someone in this virtual medium are as respectful and positive in their connotation as they would be in real life. They should be made aware of the consequences that they themselves or someone else could face if engaged in negative behaviour online. Because what you put out on the internet, comes back to you someday.

4. Monitor their online activity

Keeping track of what we do on the internet can be challenge for full-grown adults, and there are several people who get lured by internet scamming schemes and end up in a tough spot. For parents and teachers, they should share any of their own experiences they have had on the internet of falling prey to an attack, or give some real world examples, and make sure that children trod safely when starting out or transcending into more advanced usage of the internet.

5. What goes on the internet stays on the internet

Yeah, this quote is true both for Vegas and the internet. The latter example is what the educators should take to make sure that the newcomers on the internet are aware as to what extent their information can be propagated on the internet, even after they have seemingly removed it. The starters, especially younger kids should be made aware that they do not post something that might not only put them at risk but also risk your own personal information. There are enough cases of reckless social media and internet content posting, which came back to bite them, even the most seasoned users of the internet.

6. Privacy settings matter

Be it on social media or simple mobile games, children should be taught how to make the most of the custom privacy settings that they have at their disposal when navigating the internet. Each and every setting, is assured by the child to have been set in the best of ways, should be double checked
