

The pre-meeting screen in MS Teams

your camera.

- Mouse over to the background filters button and click that.
- From the menu that opens, select the background that you would like to apply.
- Close the menu, then if you want to, turn off the camera
- Join the meeting.

During a meeting

Before turning on your camera

- Hover your mouse over the camera toggle icon located on the top bar of the window.
- From the preview menu that opens, click on the more background effects option.
- In the menu, choose the background effect you would like to and click apply.
- You can also preview the effect, by clicking on the preview button located right above the apply button in the menu.
- After that, hover your mouse over the camera toggle icon to make sure that your desired effect is applied, and your framing is as you would want it.
- Open the camera by toggling it on using the button whenever you are ready.
