

After turning on your camera

- Click on the more actions button, represented with three dots, located on the top menu bar on the left side of the camera toggle.
- From the dropdown menu, select the apply background effects option to select your desired background.
- If required, click on preview to see what the effect would look like.
- Click on the apply button on the bottom to apply the effect.

To add your own background to MS Teams, click on the Add New button in the apply background filters menu, and add the desired static background.

The effects tray in MS Teams while in a meeting

Zoom

Before entering a meeting:

- Click on the settings button located on the right side of the Zoom application window.
- Locate and enter the background and filters tab.
- Select the background of your choice from the selection of preloaded backgrounds.
- Exit the menu and join the meeting.

While in a meeting:

- Locate and click on the upwards pointing arrow next to the camera
