

GNOME

The next in our list of top desktop environments is the GNU Network Object Model Environment, commonly known as GNOME. It is arguably the most leading Linux desktop environment ever emerged in the world of desktop environments. Although it is slightly younger than KDE Plasma, it has managed to position itself quite high.

Today, most popular Linux distros prioritise GNOME over others as it is designed to provide ease of access, simplicity, and reliability. These things

GNOME, A simple, beautiful, and elegant choice!

have played a huge part in the growing popularity of GNOME. The best part about the GNOME desktop environment is that it allows users to take your desktop functionalities to another level.

Cinnamon

Alongside KDE Plasma and GNOME, Cinnamon has also made its way to success, mainly due to the Linux Mint community. However, it didn't start with Cinnamon as the Linux Mint Team was working towards an improved version of GNOME named Mint GNOME Shell Extensions (MGSE).

When it did not meet the set expectations, the Cinnamon project started, which later turned into a full-fledged Linux desktop environment ruling the hearts of many today. People transitioning from Windows find it extremely easy to use Cinnamon as it imparts a familiar experience.
