

Note, although it may not be the best choice for some, it's highly recommended by others!

Xfce

Established in 1996, Xfce is another popular desktop environment built especially for machines with limited hardware resources. Compared to other desktop environments, Xfce is one of the most lightweight desktop environments available, ensuring a feature-packed experience for all its users.

Install Xfce, a lightweight and feature-packed desktop environment!

If you're looking for a performance-centric yet lightweight environment without making it too chaotic, Xfce is an ideal choice to rely on. Note, there are no major customisable options available in Xfce. Another essential feature of Xfce is that it can be used for various UNIX platforms.

Deepin

Are you someone who is attracted to visually-appealing desktops? Someone who prefers colour-coordinated wardrobes? If yes, then Deepin might be the excellent choice for you to go with. Out of all, Deepin is one of the best-looking by Deepin Technology Co., Ltd that looks almost like macOS. From neutrals to vibrant tones, Deepin offers everything soothing to the eyes yet it's quirky at the same time.
