KDE Plasma preparing for several fixes for Plasma 5.23

## Why KDE Plasma?

KDE Plasma 5.21 is the 5th and the current generation of KDE environment introduced by KDE, for the Linux systems. KDE Plasma is a free, open-source, flexible, customisable, widget-based Linux Desktop Environment developed by the KDE project. When it comes to Linux Desktop Environment, there is a list of options to choose from. Starting with KDE Plasma to GNOME and Cinnamon to Pantheon, the list is never-ending. Below, we have curated the reasons why you should use KDE Plasma. Let's have a look.
