

looking for the KDE Plasma desktop environment for your Linux platform, follow the commands to install it.

- Select the sddm login manager
- Once the installation is completed, select the Plasma desktop.
- Enjoy the feature-packed KDE Plasma 5.20

Conclusion

Undoubtedly, KDE Plasma is the best Linux desktop environment which is also one of the most popular choices out of all as it is highly customisable and light in weight. Compared to other desktop options, the KDE Plasma offers a modern and premium feel loved by all.

Using the KDE connect, you can connect your phone with your Linux system to establish quick and smooth communication. Overall, it seems that KDE has emerged as the number one choice for most users as it's incredibly lightweight and flexible at the same time and offers built-in tools which enhance user experience.

KDE Plasma has simplified our work on computers and made it more compelling through its user-friendly approach and unmatched customisable solutions. Of all 13 desktop environments that are indeed ruling the industry, KDE Plasma surely has the upper hand due to regular updates, hard work, and effective strategies.
