

Bye hello to clean and clear desktops with GNOME.

of the platform? The first time the user logs into the desktop, they are shown how the tasks are performed to minimise confusion.

### 3. Application viewer

The application viewer is another important factor that also acts as the benefit of GNOME as it allows users to glance at all the hidden icons at a single time. Just click on the activities option on the top bar, take the cursor onto the nine dots at the bottom, and view all the icons in a single go.

### 4. Desktops are created automatically

Every time the next empty desktop is down, a new desktop is automatically created, which means there will always be an empty desktop available.

### 5. Compatibility

GNOME is highly compatible as applications built on several desktops can also be used on Linux's GNOME desktop environment.

Looking at the benefits of GNOME, it can be concluded that it offers an unmatched user experience, unlike other desktop interfaces.

## Features of GNOME

GNOME 41 showcases several enticing features which are worth trying. Below, we have curated a list of them; let's have a look-
