One of the most beautiful looking linux desktop environments - Deepin.

features that make it stand out from all. By the end of the chapter, you will be thorough with each and every aspect of Deepin. So, let's get started.

From Which Desktop Environment Is This Derived From?

Deepin is one of the best-looking desktop environments, and it's also one of the most preferred open source and user-friendly desktop environments based on LightDM, developed by Ubuntu. Although it's not a new edition in the world of desktop environments, it's been recently adopted by people all around the globe and gaining much popularity in a short span.

Why Deepin?

The Deepin desktop environment, also known as the DDE, is a popular desktop environment designed by the Wuhan Deepin Technology Co., Ltd. The company is devoted to providing an intuitive and interactive interface for global users.

Apart from developing an attractive desktop, there are several reasons why Deepin is the best and most preferred Linux desktop environment for operating systems. Here, we have curated the reasons why you should use Deepin. Let's have a look-

1. Custom store

Deepin users get the chance to enter and explore Deepin's custom app, which is way better than the Ubuntu custom app store. With a lot of categories
