

discussing another popular Linux desktop environment called Pantheon which also offers a clean and attractive UI that looks almost like macOS.

Apart from it, we will be highlighting the various features that make it stand out from all. So, if you're eager to know more, let's get started.

## From Which Desktop Environment Is This Derived?

Written in Vala, Pantheon is a popular elementary OS desktop, unlike other desktop environments which are highly customisable, Pantheon offers the least customisation options, and that's the reason why you don't see many people using it. However, a section of people still prioritises Pantheon over other desktop environments.

The clean and crisp Pantheon home screen.

## Why Pantheon?

From a distance, Pantheon may appear a little similar to Cinnamon or Budgie, and also GNOME 3 to some extent; however, it isn't the same. Pantheon is developed by the Elementary OS team, which provides a highly polished appearance that ensures, clean, crisp, and user-friendly interface. The Elementary OS team does not believe in adding too many effects, aiming to build a user-intuitive environment that efficiently serves the purpose.

Below, we have curated the reasons why you should use Pantheon and give you an idea of what Pantheon brings to the table. Let's have a look-

### 1. Performance

One primary reason Linux users prioritise Pantheon over other desktop
