

environments is its excellent performance and intuitive approach, which grabs eyeballs. The performance of a desktop environment decides whether it will stand in the market or not. When Pantheon was introduced, people were dicy about its existence; however, it emerged as one of the leading Linux desktop environments and broke all records, which ultimately contributed to the users' experience.

2. User-friendly interface

Are you tired of looking at pretty interfaces that do nothing but irritate after a point? If yes, skip all those pretty-looking environments and switch to Pantheon, which provides ease at work while improving efficiency. Pantheon is a classy-looking interface that is extremely fast at the same time. So if you're a professional or a nerd, it's ridiculously easy to get comfortable with Pantheon.

Efficiency focused interface without any distractions.

3. The clean and crisp look

Another important reason anyone shifting from Windows to Linux should consider jumping to Pantheon at least once is its clean, clear, and crisp look. Are you one who does not like scattered icons, poppy colours, or chaos? If yes, then Pantheon is an ideal choice for you. However, its interface is a tad bit different; it does offer a clean and crisp look from all angles.

4. Consistency and reliability

When people talk about consistency and reliability, it does apply even to
