

ronment is exceptionally lightweight. When compared to other desktop environments such as GNOME or GNOME 3, it uses less RAM.

2. Extremely responsive

The next on the list is that the Budgie desktop environment is extremely responsive, showcasing results quickly. Therefore, for a person looking for a fast but reliable desktop environment, Budgie is an ideal choice. Note, even the GNOME 3 environment is not as responsive as Budgie.

3. Clean desktop

The Budgie desktop is folder-free and app-free to eliminate clutter with a minimalist and crisp look. Every time the user opens the desktop, they only see the top bar, and the rest of the icons are completely hidden. The intention behind this is to allow users to focus on the task rather than distractions.
