

hat encourages people to consider optimistic, speculative, and best-case possibilities.

- **Blue Hat:** The colour blue, which is associated with the sky and high above, evokes ordered thinking, a high-level overview of the problem, and a feeling of the big picture.
- **Green Hat:** The colour green is associated with trees and nature, and it represents creative, associative thinking, fresh ideas, brainstorming, and thinking beyond the box.

Six Thinking Hats is an effective decision-making strategy that incorporates multiple points of view. The approach and procedure allow emotion and scepticism to be introduced into what would otherwise be a purely rational process, allowing for creativity in decision-making. Decisions made with the Six Thinking Hats technique are more reliable and based on a holistic perspective, allowing you to avoid pitfalls and gaps before making a commitment.
