

these materials serve as important information stores for human civilization, ranging from papers on the nature of physical laws that govern the cosmos to historical documents and visual art. Being able to interact with this richness of knowledge and comprehending its enormity makes one feel small and humble, but also respectful and appreciative for its creation and memories that define our civilisation.

How to use Google Search effectively

Everyone knows how to Google but did you also know that there are several operators and terms that you can include in your searches to fine tune the results. Yes, we're aware that this might lead to some biases entering your data but this will also help you speed up your research. Here are some of the most useful tricks to Google effectively.

Use search operators to fine tune your results

1. Double quotes

Let's say you're searching on Google for content about green hats. Instead of just typing green hats into the Google search box, you will likely be better off searching explicitly for the phrase. To do this, simply enclose the search phrase within double quotes.

Example: "green hats"

2. - Operator

Let's say you want to search for content about green hats, but you want to
