

Ever forgotten a word or two from a specific phrase, song lyric, movie quote, or something else? You can use an asterisk* as a wildcard, which can help you find the missing word in a phrase.

Example: luke * your father

15. Location specific news

If you're looking for news related to a specific location, you can use the location: command to search Google News for stories coming from that location.

Example:: storm troopers location:tatooine

16. Specific file types

If you're looking to find results that are of a specific type, you can use the modifier filetype:. For example, you might want to find only Excel spreadsheets related to hat sizes.

Example: "hat sizes" filetype:xlsx

17. Translations

Want to translate a simple word or phrase from one language to another? No need to go to a translation website. Just search translate [word] to [language].

Example: translate comprendre to english

You don't need a thesaurus. Let Google do all the work
