

Don't believe everything you read

media. While this is really beneficial for a variety of reasons, it has also created the ideal environment for misinformation to spread like wildfire.

According to research, Facebook users interact with misinformation — which often takes the shape of fake news — an average of 70 million times per month. This is a decrease from the peak of 200 million monthly fake news engagements in 2016, yet it is still a significant number. False content is shared 4 million to 6 million times each month on Twitter, a figure that has not decreased since the 2016 election.
