

evidence or interviews with experts who disagree with the piece's prevailing tone.

Are you falling prey to confirmation bias?

The human inclination to seek out and believe information that confirms our preconceptions is known as confirmation bias. It's critical to examine your own reaction to knowledge when studying any source. Is the source of information telling you exactly what you want to hear? Is it tough to notice that a source isn't as trustworthy as you think it is because of confirmation bias? When your emotions are strong and a healthy level of scepticism is absent, you're experiencing confirmation bias.

Be wary of confirmation bias

When in doubt, look to the trusted sources

Even if you can't believe everything you read on the internet, there are still lots of trustworthy sources of information.

- **Associated Press:** The Associated Press is a non-profit news organisation that has won 53 Pulitzer Prizes and has an unincorporated structure with over 1,000 members, including newspapers and broadcasters in the United States.

AP ASSOCIATED PRESS

A trusted source for news

- **Reuters:** Reuters is a trusted source of information for other news organisations, and it is owned by Thomson Reuters, which restricts corporate control.
- **PBS:** The Public Broadcasting Service is a nonprofit organisation that puts content through a test to ensure that it does not promote the interests of backers.
