

How to make a mind map

Visualise your thoughts using a simple mind map

A mind map is a visual information management tool that aids in the structure, organisation, memorization, arrangement, brainstorming, and learning of highly specialised information. Over the last two decades, we've gained remarkable insights into the human mind and our seemingly endless capacity to think, absorb, and store massive amounts of data. These investigations have revealed that our ability to think efficiently and fast is inextricably linked to our imagination and our ability to make connections between disparate pieces of information.

Tony Buzan, an English author and teacher, came up with the technique that we all commonly know as a mind map. He was inspired by Leonardo da
