

A typical mind map

Step 3 - At least four thick organic-looking branches should radiate outwards from the centre image. It's a good idea to give each branch a different colour.

Step 4 - Along these branches, write important words (headings) that represent the central image and the topic you're mapping.

Step 5 - Draw other branches that branch out from your primary branches. These branches' words are subtopics of the words you wrote on the main branches.

Step 6 - Continue to extend the mind map by adding more sub-topics, keywords, and branches.

Step 7 - To increase your recollection and recall of the material you're mapping, refer to the mind mapping guidelines described in the next section.

Mind Mapping Guidelines

Please keep in mind that following all of the guidelines given below is not required. Checking them all off your list, on the other hand, can be really beneficial. This is because adhering to each rule will assist you remember and recall the material you're mind mapping. Each of these guidelines are meant to link related ideas and concepts with each other and generate a hierarchy of sorts. Here are the guidelines:

- To classify distinct types of thoughts and ideas, use symbols.
